Quotes from Maharishi Mahesh Yogi

1. "The whole purpose of life is to gain enlightenment.
Nothing else is significant compared to that completely natural, exalted state of consciousness.
So always strive for that.
Set your life around that goal.
Don't get caught up in small things and then it will be yours."
- (sent in by Bill Burfey)
2. "Enjoy your life and be happy.
Being happy is of the utmost importance.
Success in anything is through happiness.
More support of nature comes from being happy.
Under all circumstances be happy, even if you have to force it a bit to change some long standing habits.
Just think of any negativity that comes to you as a rain drop falling into the ocean of your bliss.
You may not always have an ocean of bliss, but think that way anyway and it will help it come.
Doubting is not blissful and does not create happiness.
Be happy, healthy and let that love flow through your heart."
1987

TRANSCENDENTAL MEDITATION

Transcendental Meditation was brought to the world by Maharishi Mahesh Yogi 50 years ago and has been learned by five million people.

Transcendental Meditation is a simple but powerful mental technique which allows the mind to transcend, or settle to the deepest state of awareness. It does not involve any mental control, concentration or any active thought process.

BENEFITS OF TM

Transcendental Meditation unfolds the full potential of life. Extensive research has found that it reduces stress and anxiety resulting in more inner peace, creativity, health, success and happiness.

WHAT IS THE TM TECHNIQUE

It's an effective technique practiced 20 minutes twice each day while sitting comfortably with the eyes closed. It's is taught only in person by qualified TM Teachers who go through an extensive teacher training.

It is easy to learn and enjoyable to practice, regardless of religion, philosophy, or lifestyle. Over five million people all over the world have learned it- people of all ages, cultures and religions.

M.C.B.E.

(Maharishi's Consciousness Based Education)

INTRODUCTION

Maharshi Mahesh Yogi, the founder of Consciousness-Based-Education has brought to light the hundreds of principles of teaching and curriculum, which can be viewed as laws of nature' governing the teaching and learning process. These principles help ensure efficient and fulfilling learning in a natural way, these principles refine and strengthen the different levels of the students personality perception, mind, intellect, feelings and ego, accelerating the unfolding of 'Total Knowledge', the state of complete alertness and happiness in each student. This state is characterised by total brain functioning, when all the parts of the brain communicate with each other to create a coherent, integrated brain and the use of one's full creature potential in daily life.
